

ABDULLAH JUTT

Software Engineer

Lahore, Pakistan | +92 301-6882859 | abdullahkips75@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Software Engineer with hands-on experience building and maintaining production software across web, mobile, backend, and business applications. Experienced with React, Next.js, React Native, Node.js, Express, MongoDB, REST APIs, and SQLite. Contributed to SaaS products and delivered real-world client solutions including logistics, point-of-sale, business management, and shared-expense applications.

TECHNICAL SKILLS

- Languages: JavaScript, TypeScript
- Frontend: React, Next.js, React Native, Expo, Tailwind CSS
- Backend: Node.js, Express.js, REST APIs
- Databases: MongoDB, SQLite
- Tools & Libraries: Redux Toolkit, RTK Query, Git, Socket.IO, Stripe

PROFESSIONAL EXPERIENCE

Software Developer

TECHFLOW SOLUTIONS | Early 2026 – Present

- Develop and maintain production SaaS products and business platforms across web and backend systems.
- Build scalable backend services, REST APIs, and data models using Node.js and MongoDB.
- Contribute to customer-facing workflows across web applications, mobile applications, and admin dashboards.
- Work across React, Next.js, React Native, and backend services with a focus on maintainability and reliable delivery.

Junior Software Engineer

MEZ TECH SOLUTIONS | Mid 2025 – Early 2026

- Built and maintained SaaS products, cross-platform mobile applications, and administrative dashboards.
- Developed frontend interfaces and backend APIs using React, React Native, Node.js, Express, and MongoDB.
- Contributed to database design, REST API development, application integration, and deployment workflows.
- Worked across the full stack to deliver production features for real business use cases.

Full-Stack Developer Intern

CODELAB | Early 2025 – Mid 2025

- Completed intensive hands-on full-stack development through practical software projects.
- Built features across frontend, backend, database, and application layers while strengthening software engineering fundamentals.
- Worked with Git and modern web development practices to develop and integrate application features.

SELECTED CLIENT PROJECTS

Cargoza — Dispatch & Logistics

Technologies: React Native, Expo, Node.js, MongoDB, Socket.IO, Stripe

Logistics platform connecting drivers and vehicle owners with dispatch opportunities through route-based matching and real-time communication.

Siflo — Business Management & POS

Technologies: React Native, Expo, Express, MongoDB, RTK Query, SQLite

Cross-platform POS and business management application for sales, purchases, customers, suppliers, payments, inventory, and financial reporting.

Pesticide Shop POS — Desktop Business Software

Technologies: React, Electron, Vite, SQLite, Node.js

Real-world desktop POS system covering inventory, sales, purchases, suppliers, customers, ledgers, expenses, reports, and backups.

SplitEx — Shared Expense Management

Technologies: Technology stack not specified

Money-management application for hostels and groups of friends, tracking shared expenses, individual balances, and how much each person needs to pay.
